

Lesson 4

Word List

Study the definitions of the words below; then do the exercises for the lesson.

aloft
ə lɔft'

adv. Up in the air, especially in flight.
A strong breeze kept the kites **aloft**.

attain
ə tɑn'

v. 1. To reach; to arrive at.
Redwood trees **attain** heights of over 300 feet.
2. To achieve.
The library **attained** its lofty goal of raising ten thousand dollars for the repair fund.

buffet
bʌ fɑ'

n. 1. A piece of furniture with drawers and shelves for the display of plates, dishes, and bowls.
This splendid antique **buffet** contains a valuable collection of china.
2. A meal laid out for guests to help themselves.
The abundance of food at the **buffet** allowed people to go back for second or third helpings.
v. (bʌf'ət) To pound repeatedly; to batter.
High winds and waves **buffeted** the ship during the storm.

elude
ē lōd'

v. To escape by being quick or clever.
The mouse **eluded** the cat by slipping through a crack in the wall.
elusive *adj.* (ē lōd' sɪv) 1. Hard to find or capture.
The **elusive** outlaws were familiar with the terrain while those pursuing them were not.
2. Hard to explain or make clear.
Albert Einstein's connection between energy and the speed of light is too **elusive** for most nonscientists to grasp.

flammable
flam' ə bəl

adj. Able to catch fire easily.
Children's night clothes must be fireproofed so they are not **flammable**.

hover
huv' ə

v. To remain in place over an object or location.
Hummingbirds **hover** by beating their wings sixty times a second.

inflate
in flāt'

v. To fill with air or other gas.
Inflate the tires to the correct pressure.

jeopardy
jep' ə r dē

n. Danger.
Mountaineers who climb without partners put their lives in **jeopardy**.
jeopardize *v.* To put in danger of loss or injury.
Smokers **jeopardize** their health by smoking cigarettes.

moor
moor

v. To hold in place with ropes or anchors.
After the sailors **moored** the boat to the dock, they went ashore.
mooring *n.* A place to which a boat or aircraft can be moored.
The hurricane tore many boats from their **moorings**.

plummet
plum' ət

v. To fall suddenly toward the earth or to a lower level; to plunge.
The abundant harvest caused the price of corn to **plummet**.

pollute
pə lōōt'

v. To make impure or dirty.
Smoke from cars' engines **pollutes** the air of our cities.
pollution n. (pə lōō' shən) The action of polluting; the state of being polluted.
The careless dumping of poisonous chemicals caused widespread **pollution** of the soil.

propel
prə pel'

v. To push or drive forward.
Two engines **propelled** the speedboat.

stationary
stā' shə ner ē

adj. 1. Not moving.
A **stationary** bicycle is used for exercise.
2. Not changing.
The price of admission to the ball park has remained **stationary** for the past couple of years.

superb
sə pərb'

adj. Of the highest quality; grand; splendid.
The view from the mountaintop was **superb**.

swivel
swiv' əl

n. A fastening that allows any part joined to it to swing freely.
This chair has a **swivel** that enables it to turn in a full circle.
v. To turn freely around a fixed point.
Owls can **swivel** their heads to look behind them.

4A Finding Meanings

Choose two phrases to form a sentence that correctly uses a word from Word List 4. Write each sentence on the line provided.

aloft

attain

buffet

elude

flammable

hover

inflate

jeopardy

moor

plummet

pollute

propel

stationary

superb

swivel

1. (a) A buffet is
(b) a sudden loss of control.

- (c) A mooring is
(d) a piece of furniture for displaying plates.

2. (a) To attain something is to
(b) To jeopardize something is to

- (c) stay away from it.
(d) put it in harm's way.

3. (a) To swivel is to
(b) fall suddenly to earth.

- (c) To plummet is to
(d) avoid getting caught.

4. (a) A superb automobile is one
(b) that is in need of repair.

- (c) that is not moving.
(d) A stationary automobile is one

- | | |
|--|--|
| 5. (a) A mooring is
(b) A swivel is | (c) a small hole that allows air to escape.
(d) a fastening that allows parts to move freely. |
| 6. (a) To attain something is to
(b) let it go. | (c) reach it.
(d) To inflate something is to |
| 7. (a) lose sight of it.
(b) To elude something is to | (c) To propel something is to
(d) drive it forward. |
| 8. (a) bring it onto dry land.
(b) To moor a boat is to | (c) To inflate a boat is to
(d) hold it in place with ropes. |

4B Just the Right Word

Improve each of the following sentences by crossing out the bold phrase and replacing it with a word (or a form of the word) from Word List 4.

- I was pleased when I **finally achieved** my goal of doing twenty push-ups.
- The telescope **swings in any direction** so that it can be pointed to any part of the sky.
- You can **pump some air into** that air mattress with this bicycle pump.
- It's easier to hit a target that is **fixed in one spot and doesn't move**.
- Materials that are **quick to catch fire** should be segregated in a fireproof container.
- One expects the food at four-star restaurants to be **of the highest quality**.
- I attempted to **get away from** my pursuer by hiding in a doorway.
- It was a great thrill when we went **up in the air** in a hot-air balloon.
- I started to feel seasick as the waves **continued to pound over and over against** the boat.
- The helicopter **stayed in the air while remaining in place** over the ship's deck while its cargo was lowered.

11. The water has been **made unfit for drinking** by the large amounts of chemicals dumped into it.

4C Applying Meanings

Circle the letter of each correct answer to the questions below. Each question has from one to four correct answers.

1. Which of the following can be **inflated**?

- | | |
|--------------|-----------|
| (a) balloons | (c) tires |
| (b) prices | (d) kites |

2. Which of the following might cause **pollution**?

- | | |
|-----------------|------------|
| (a) car exhaust | (c) oceans |
| (b) chemicals | (d) people |

3. Which of the following can take you **aloft**?

- | | |
|------------------|------------------|
| (a) a plane | (c) an elevator |
| (b) a helicopter | (d) a racing car |

4. Which of the following can **hover**?

- | | |
|--------------------|------------------|
| (a) a hummingbird | (c) a train |
| (b) a jet airplane | (d) a helicopter |

5. Which of the following are **flammable**?

- | | |
|-------------------|-----------------|
| (a) gasoline | (c) straw |
| (b) wooden crates | (d) metal boxes |

6. Which of the following can be **elusive**?

- | | |
|-------------------------|-------------------------|
| (a) ideas | (c) memories |
| (b) an escaped prisoner | (d) the title of a book |

7. Which of the following might be on a **mooring**?

- | | |
|-------------|----------------------|
| (a) a ferry | (c) a tree |
| (b) a house | (d) a trip to Europe |

8. Which of the following can **propel** a boat?

- | | |
|---------------|-----------------|
| (a) the wind | (c) oars |
| (b) the stars | (d) sharp rocks |

aloft
attain
buffet
elude
flammable
hover
inflate
jeopardy
moor
plummet
pollute
propel
stationary
superb
swivel

4D Word Study

Some words are made up of more than one part. The part that comes before the base word is called a *prefix*. *Pre-* comes from Latin and means “before.” Changing or adding a prefix can sometimes turn a word into its opposite.

Change each of the words below into its opposite by adding, dropping, or changing the prefix. Use one of these four prefixes, all of which mean “opposite of” or “not”: *de-*, *dis-*, *un-*, *in-*.

1. conspicuous _____
2. inflate _____
3. upgrade _____
4. veil _____
5. inhabited _____
6. distinct _____
7. incredible _____
8. integrate _____
9. appealing _____
10. clasp _____

4E Passage

Read the passage below; then complete the exercise the follows.

A Different Way to Fly

Billboards standing along the highway are easily ignored, but a two-hundred-foot billboard floating across the sky grabs everyone’s attention. That’s why blimps are so attractive to advertisers with a product to sell or a message to communicate. But advertising is only one of the uses for a blimp.

Because they can be moved easily to different locations at varying altitudes, scientists use blimps for collecting samples used in the study of air **pollution**; the United States Navy employs them for offshore patrols; and one was even used to search for the **elusive** Loch Ness monster, supposed to inhabit a lake in Scotland.

A blimp is a large bag, called the envelope, that is **inflated** with helium gas. The blimp stays **aloft** because helium is seven times lighter than air. Once inside the envelope, the helium is left there unless the blimp needs major repairs. After the envelope has been filled, a cabin called a gondola is attached under it; this is where the crew and passengers ride. It is also where the light panels used for advertisements are attached. Computer graphics provide a dazzling display of pictures and words that can’t be matched by any billboard.

Blimps are **propelled** by two engines, one on each side, and can **attain** a top speed of about forty miles an hour. Although slow in comparison to airplanes, blimps can do something most planes cannot: they can stop and **hover** in midair. This ability enables them to provide a **stationary** platform for the television cameras covering sporting events, giving viewers a bird’s eye view of the action.

Blimps are not designed to take a **buffeting** from high winds, so they usually can go up only when the air is calm. When not flying, they have to be **moored** by the front end to a tall mast on a truck specially equipped for this purpose. Plenty of space is needed because the blimp has to be free to **swivel** clear of the ground when the wind changes.

In some cities it is possible to buy a ticket and go for a sightseeing trip in a blimp; because blimps fly so slowly and at such a low altitude, those on board enjoy **superb** views of the ground below. You might wonder what would happen if the envelope got a small hole in it. Would the helium rush out, causing the gondola to **plummet** to the ground? Passengers need not worry about that; their lives would not be in **jeopardy** if such a thing happened. Since the pressure of the air outside the envelope is greater than that of the helium inside, the helium doesn't easily escape. And since helium is not **flammable**, there is no danger of the envelope's contents catching fire. Flying in a blimp is safe and enjoyable.

Answer each of the following questions in the form of a sentence. If a question does not contain a vocabulary word from this lesson's word list, use one in your answer. Use each word only once. Questions and answers will then contain all fifteen words (or forms of the words).

1. Give two reasons why helium is used to fill a blimp's envelope.

2. For how long does the blimp's envelope remain **inflated**?

3. What is the meaning of **elusive** as it is used in the passage?

4. What would happen to the gondola if it became separated from the envelope while the blimp was in flight?

5. What is the meaning of **stationary** as it is used in the passage?

6. How can blimps be of use in scientific studies of the air?

7. What is the purpose of the **swivel** to which the blimp is attached?

8. Why does a blimp need to be **moored** when on the ground?

9. Why does a blimp's movement not depend on the direction of the wind?

10. What is the meaning of **attain** as it is used in the passage?

11. How could bad weather **jeopardize** a planned trip in a blimp?

12. Are engines essential to keep a blimp in the air? Why or why not?

13. Why do some advertisers think a blimp is a **superb** way to get their message across?

14. What is the meaning of **buffet** as it is used in the passage?

15. Why is a blimp useful as a platform for cameras for sporting events?
